# **ENG1 Software Testing**

Cohort 3 - Group 28

"Team 28"

Muhammed Salahudheen Joel McBride Jamie Rogers Maciek Zaweracz Rhys Yeaxlee Alex Spencer Alex Firth

- Software Testing Report [18 marks]:
  - a) Briefly summarise your testing method(s) and approach(es), explaining why these are appropriate for the project. (4 marks,  $\leq 1 page$ )
  - b) Give a brief report on the actual tests, including statistics of what tests were run and what results were achieved, with a clear statement of any tests that are failed by the current implementation. If some tests failed, explain why these do not or cannot be passed and comment on what is needed to enable all tests to be passed. If no tests failed, comment on the completeness and correctness of your tests instead (10 marks, ≤ 3 pages).
  - c) Provide the precise URLs for the testing material on the website: this material should comprise the testing results and coverage report generated by your automated testing tooling, and descriptions of manual test-cases that you designed to test the parts of the code that could not be covered by your automated tests (4 marks).

## Summary

Software testing is an essential part of any software engineering project, but the circumstances of creating a game force a certain approach. All tests need to be based on the requirements. At minimum every requirement listed "shall" must be tested for, ideally the tests cover every single requirement. Unit testing a highly effective method of testing code functionality due to its speed and objectivity. In games, the high degree on interactivity limits how much can be tested with Unit Tests. A manual test plan must fill in the gaps, which must have specific inputs and expected outputs to ensure reliability. If a unit or manual test fails, we must alter the tested code to ensure adherence to the requirements the tests are based on.

### **Test**

### **Unit Tests**

AssetsTests exists to check for image and sound files that are essential for users to understand the game environment. The assets act as affordances that help user navigate the User Interface, so their existence is essential. These tests are primarily for future proofing, in case assets are replaced these tests make sure that the files that use the assets actually have the correct path.

Persistence test simply checks for the persistent data used to store high scores.

PlayerTests has one test to ensure the position can be changed. The other tests ensure that interactable objects have the expected bounds.

All the above tests completely succeeded. The results can be found by following the link in section 4c.

#### **Manual Tests**

<u> </u>				
Test	What the Test Data is	Where the	What the expected result is	What the purpose of the test
ID		Test Data will		is
		be used		
1	Clicking the interact	Main Game	Duck feeding shall engage, fun will	UR_INTERACT
	button after		increment, time shall increment	UR_RECREATE
	approaching the dock			UR_TIME_SKIP
2	Clicking the interact	Main Game	Sport recreation shall engage, fun	UR_INTERACT
	button after		will go up, time shall increment	UR_RECREATE
	approaching the sport			UR_TIME_SKIP
	building			
3	Clicking the eat button	Main Game	Feeding shall engage, food will	UR_INTERACT
	after approaching the		increment, time shall increment	UR_EAT
	piazza building			
4	Clicking the study	Main Game	Studying shall engage, study shall	UR_INTERACT
	button after		increment, time shall increment	UR_STUDY
	approaching the piazza			UR_STUDY_GAME
	building			UR_TIME_SKIP
5	Clicking the study	Main Game	Studying shall engage, study shall	UR_INTERACT
	button after		increment, time shall increment	UR_STUDY
	approaching the			UR_STUDY_GAME
	compact, building			UR_TIME_SKIP
6	Holding up	Main Game	Character moves up	UR_MOVEMENT
7	Holding left	Main Game	Character moves left	UR_MOVEMENT
8	Holding down	Main Game	Character moves down	UR_MOVEMENT
9	Holding right	Main Game	Character moves right	UR_MOVEMENT
10	Clicking the sleep early	Main Game	Sleep engaged, next day progressed	UR_INTERACT
	button after			UR_SLEEP
	approaching the			UR_TIME_SKIP
	Goodricke building			
	between 20:00 and			
	23:00			

	23.00			1
11	Walk around	Main Game	Map is made visible	UR_MOVEMENT
				UR_MAP_DESIGN
				UR_CAMPUS_BUILDINGS
12	Wait for name entry	Main Game	Name entry screen appears	UR_USERNAME
	screen			UR_GAME_LENGTH
13	Enter name into	Name entry	Leaderboard accepts the name	UR_LEADERBOARD
	leaderboard	screen		UR_USERNAME
14	Every day walk to niga	Leaderboard	Bonus points are scored	UR_STREAKS
	and perform	screen		
	recreation, then view			
	results screen after			
	entering name			
15	Every day walk to	Leaderboard	Bonus points are scored	UR_STREAKS
	piazza and perform	screen		
	eating, then view			
	results screen after			
	entering name			
16	Every day walk to	Leaderboard	Bonus points are scored	UR_STREAKS
	compact and perform	screen		

	studying, then view results screen after entering name			
17	Input the correct number codes during the study game	Study game	Success message displayed	UR_STUDY_GAME
18	Input the incorrect number code during the study game	Study game	Failure message displayed	UR_STUDY_GAME
19	Play for 5-6 minutes	Main Game	The game will end	UR_GAME_LENGTH
20	Clicking the interact button after approaching Nisa	Main Game	Time will pass and the fun meter will go increment	UR_INTERACT UR_RECREATE UR_TIME_SKIP
21	Achieve a high score, then go to the leaderboard screen to see your name at the top	Leaderboard Screen Name screen	The name and score will appear	UR_LEADERBOARD UR_HI_SCORE UR_USERNAME
22	Click on controls	Controls screen	The scenario and controls will be presented	UR_CONTROLS UR_OBJECTIVE
23	Enter nothing into the name entry screen	Name entry screen	Leaderboard rejects and requests re-entry	UR_LEADERBOARD UR_USERNAME

The above table describes every manual test, including the inputs, where the inputs would be performed, the expected results and what requirements they address. It should be noted that all but test 19 had unusual game speeds applied to reduce the time spent on each test. We believe there is little room for that alteration to corrupt the results.

Out of all the tests, only 15 and 19 had failures, that were quickly resolved.

The testing table and relevant videos can found on our website.
